Profile

- **Summary:** Second-year Computer Science Engineering student at The Maharaja Sayajirao University of Baroda and an AI/ML enthusiast with hands-on experience in building intelligent systems, full-stack applications, and data-driven platforms. Actively involved in hackathons, research-driven projects, and startup initiatives including government-supported innovations. Interested in applying Artificial Intelligence to solve real-world problems in agriculture, smart cities, and climate technology.

Education

The Maharaja Sayajirao University of Baroda Bachelor of Engineering – Computer Science and Engineering (CGPA: 9.19) Jun 2024 – Apr 2028	Vadodara, India
Shannen School Higher Secondary Education (Class XII) – 92% Completed: 2024	Vadodara, India
Bright School Secondary School Education (Class X) – 95% Completed: 2022	Vadodara, India

Skills Summary

- **Programming Languages:** C, C++, Java, HTML5
- **AI / Machine Learning:** Machine Learning, Model Training, Random Forest, LLM Applications
- **Tools & Platforms:** Git, GitHub, Supabase
- **Soft Skills:** Leadership, Team Collaboration, Problem Solving, Technical Communication

Experience

Neuralize Team Member	Vadodara, India Jan 2026 – Present
• Maintaining the official Neuralize website and social media pages. • Writing content for club activities and serving as a speaker in a recent workshop.	

Projects

- **AgriForge AI – Smart Agriculture Platform**
Built an LLM-powered agriculture system for crop classification, disease detection, advisory insights, crop calendar integration, and market yard price analysis.
- **Eunoia Homoeopathy – Professional Website**
Delivered a complete client-ready website from design to deployment including hosting, domain setup, and production deployment.
- **Urban Intel AI – Smart City Governance Platform**
Built an AI system to predict urban risks such as water scarcity, traffic congestion, and health hazards. Trained six Random Forest models and integrated TinyLlama for policy recommendations while ensuring complete local data privacy.
- **Mumbai Pulse – CityForge (NASA Space Apps Challenge 2025)**
Developed a real-time city analytics platform using NASA Earth Observation data and created GIS dashboards for heat, air quality, and water monitoring.

- **Smart Cattle Health & Milk Yield Prediction System**

Developed an AI-powered dairy management system achieving 90% milk prediction accuracy and 85% disease detection accuracy with dashboards and PDF reports.

- **Coastal Threat Alert System**

Built an AI and satellite-data platform for coastal disaster alerts and designed role-based dashboards for multiple stakeholders.

- **Agent Arena**

Agent Arena discovers your competitors from your website, collects live signals from GitHub and Hacker News, stores long-term memory in Hindsight, and uses Groq to classify threats, answer questions, and recommend actions.

Honors and Awards

- Winner – NASA Space Apps Challenge 2025 (Local Event)
- SSIP Funding Recipient – AgriForge AI selected for SSIP funding
- 1st Runner-Up – Ingenious Hackathon 7.0 (Ahmedabad University)
- Top 8 Finalist – Dot Slash 9.0: NIT Surat
- Top 10 Finalist – Game Jam: ITM University Baroda
- Top 40 Finalist – HackovateLJ 2025 (LJ University)
- Final Round of HackBaroda (2026)
- Participant – HackOut 2025 Hackathon (DA-IICT)
- Certificate of Acknowledgement – Bharatiya Antariksh Hackathon 2025 (ISRO)

Additional Information

- **Languages:** English, Hindi, Gujarati
- **Leadership:** Project Lead and Architect for multiple hackathon teams
- **Interests:** AI for Social Impact, Climate Tech, Hackathons, Open Source
